Survey Notes

These results are from a Saint Anselm College Survey Center poll based on online surveys of 1672 New Hampshire likely voters. Surveys were collected between October 19th and 20th, 2026, from cell phone users randomly drawn from a sample of registered voters reflecting the demographic and partisan characteristics of the voting population. Names were presented in random order for the favorability and ballot tests. The survey has an overall margin of sampling error of +/- 2.4% with a confidence interval of 95%. The questions pertaining to the 1st and 2nd Congressional Districts have a margin of error of 3.3% and 3.4% respectively. The Presidential Primary ballot tests for the Democratic and Republican parties have a margin of error of 3.5% and 3.6% respectively. The data are weighted for party registration, age, gender, geography, and education based on a voter demographic model derived from historical voting patterns.

New Hampshire has a referendum on the ballot this year that would establish a two-year cap on local school district property taxes. Under the proposal, the amount raised through local school property taxes could increase only to account for inflation and new construction. The proposal would also limit school administrative unit central office spending to 6% of total school district appropriations. Certain capital costs would be excluded, and the limits could be overridden with voter approval.

Summary of Findings

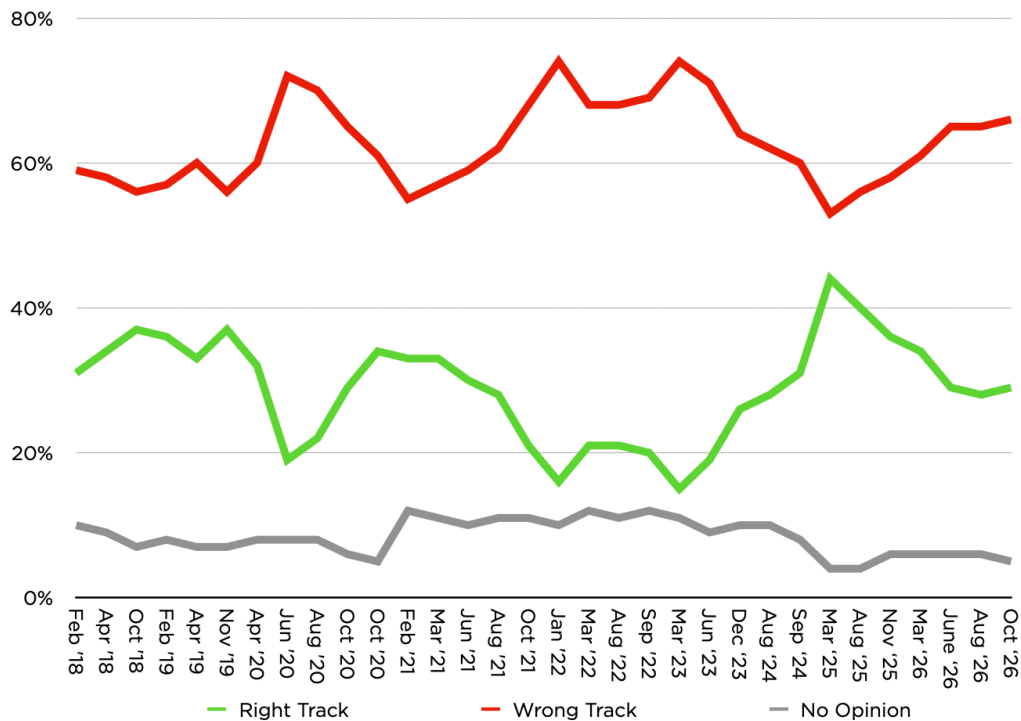

New Hampshire Institute of Politics Executive Director Neil Levesque summarized the results, saying, “The upcoming election is taking shape in a political environment where inflation and affordability remain central concerns, presenting challenges for the party in power. Public views of many candidates for top offices are mixed, while Democratic voters appear somewhat more energized, in part reflecting their views of President Donald Trump and his administration. These dynamics, alongside ongoing economic concerns, are likely to shape the electoral landscape.”

- **President Donald Trump isn’t on the ballot, but his unpopularity looms over the elections.** Only 38% approve of how Trump is handling his job as President, while 62% disapprove. Opposition is nearly unanimous (99%) among Democratic voters, while 18% of Republican voters disapprove.
- **Voter concerns are working against the incumbent party.** Leading the list of issues important to voters are economy/inflation at 19%, elections/democracy at 18%, and affordability at 17%. These reflect concerns about high prices across the economy.
- **Democratic voters are more likely to turn out than Republican voters.** 98% of Democratic respondents are “extremely likely” to vote, versus 92% of Republicans.
- **The Democratic Party continues to hold a substantial advantage on the generic ballot.** Voters give the Democratic Party the nod, 52%-43%.
- **Democratic Congressman Chris Pappas and former Senator John E. Sununu both have net-negative favorability ratings.** Pappas’s rating stands at 41% favorable to 56% unfavorable (-15 net), while Sununu’s is 40% favorable to 56% unfavorable (-16 net).
- **Despite similarly negative favorability ratings for both candidates, the broader political environment currently favors Democrats.** The Senate ballot closely mirrors the generic ballot, with Democrats leading 50%-43%. For Sununu to narrow the gap, he would need to perform better than the Republican baseline reflected in the generic ballot.
- **In the more competitive 1st Congressional District, Democratic nominee Stefany Shaheen trails the generic Democratic ballot benchmark but maintains a lead over Republican Anthony DiLorenzo.** The broader political environment favors Democrats by 5 points on the generic ballot (49%-44%), while Shaheen leads DiLorenzo by 4 points (46%-42%). As in the Senate race, both candidates have net-negative favorability ratings, with the broader political environment providing a favorable backdrop for the Democratic candidate.

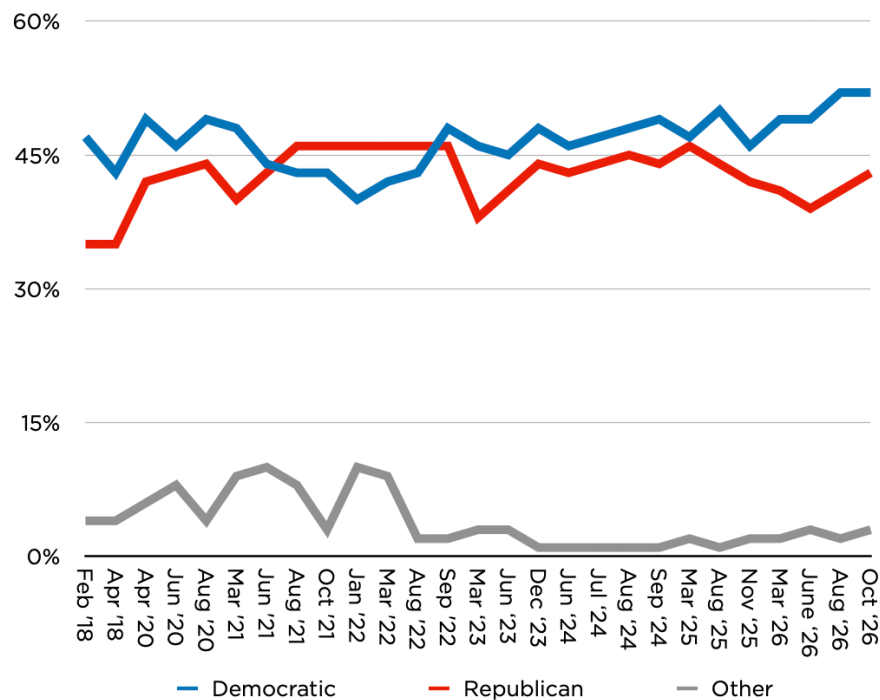

- **Congresswoman Maggie Goodlander has faced relatively limited negative campaigning and maintains a favorable image and a substantial lead in the race.** She is one of only two candidates for major office with a net-positive image (49%-42%). Her opponent, Lily Tang Williams, has a slightly net-negative image (35%-37%). In this more Democratic-leaning congressional district, Goodlander leads the contest by 16 points, 54%-38%.
- **Governor Kelly Ayotte maintains majority approval and a lead over challenger Cinde Warmington despite a challenging political environment.** A majority of respondents (51%) approve of the job Ayotte is doing. Warmington has a net-negative favorability rating (32%-45%), amid a negative advertising environment, while Ayotte leads the gubernatorial ballot by 8 points, 50%-42%.
- **The property tax cap referendum is popular, but will likely fall short of the necessary supermajority in most cities and towns.** The referendum question attracts 57% support, just shy of the 60% needed to adopt, which means it will likely be successful in some but not most localities. It is supported by 83% of Republicans and opposed by 57% of Democrats.
- **2020 second-place finisher Pete Buttigieg continues to be the favorite in the New Hampshire Democratic Presidential Primary.** The former Transportation Secretary enjoys the support of 28% of Democratic voters, followed by Georgia Senator Jon Ossoff with 14%, Arizona Senator Mark Kelly with 11%, and New York Congresswoman Alexandria Ocasio-Cortez with 10%.
- **Vice-President J.D. Vance and Secretary of State Marco Rubio are tied in the New Hampshire Republican Presidential Primary.** Both Vance and Rubio enjoy 38% support. No other tested potential candidate is in double digits.

New Hampshire has a referendum on the ballot this year that would establish a two-year cap on local school district property taxes. Under the proposal, the amount raised through local school property taxes could increase only to account for inflation and new construction. The proposal would also limit school administrative unit central office spending to 6% of total school district appropriations. Certain capital costs would be excluded, and the limits could be overridden with voter approval.

The Saint Anselm College Survey Center (SACSC) was founded in the wake of the 2016 election, and launched its first poll in February 2018 as the midterm elections were getting underway. Housed within the New Hampshire Institute of Politics at Saint Anselm College, the Center conducts quarterly polls of New Hampshire voter attitudes and additional polls as circumstances warrant. This research supports the academic mission of the College, and provides students with a practical education in survey techniques while providing the public at large with insight into political opinion trends that impact the state's federal and gubernatorial elections. To support its operations, the Center performs commissioned research on behalf of nonprofit organizations and corporations.
