## Virtual Teaching in the Clinical Capstone

Our seniors have had to make some serious adjustments to how they will work in their clinical capstone this year. Here is what a few of them had to say about teaching and learning virtually.

*"Virtual teaching brings new insight to the lives of students, and helps educators better understand who they are."*

- Julia Hand

*"Teaching and learning virtually has proven to be challenging thus far, but I'm eager to learn new ways to keep students interested in academic content through the use of technology."*

- Tia Pisano

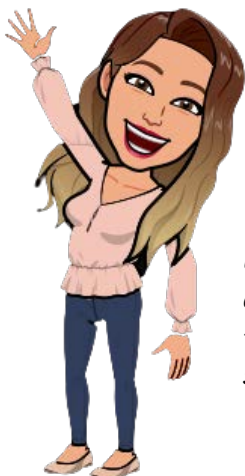

*"Virtual learning has given me the opportunity to use more online resources to make the classroom more fun and engaging for my students"*

- Caleigh Sullivan

*"Although virtual learning is a new journey for many teachers, I think that it is exciting to find new ways to explore the world around us. In this day and age, I think that it will be useful to be familiar with all of the technological resources available to us for educational use!"*

- Theresa Castro

*"Virtual teaching may not be ideal, however, it will allow me to find creative ways to engage with students at a distance."*

- Kaylee Tucker

*"After spending last semester as a virtual learner, it really made me appreciate the value of being in a classroom. I hope to combine both my in class teaching I've done with my virtual learning experience to help students make the most out and learn lots from this unique situation!"*

- Madelyn Cleary
