A SURVEY OF NEW HAMPSHIRE VOTER ATTITUDES AUGUST 2020

Neil Levesque
Executive Director, New Hampshire Institute of Politics

Faculty Advisor:
Tauna Sisco, PhD
Chair, Department of Sociology

SURVEY NOTES:

These results are from the Saint Anselm College Survey Center poll based on online surveys of 1042 New Hampshire registered voters expressing an interest in this fall's elections for President, Governor, and Congress. Surveys were collected between August 15 and 17, 2020, from cell phone users randomly drawn from a sample of registered voters reflecting the demographic and partisan characteristics of the voting population. For questions in which respondents were asked to select from a list of options (e.g. presidential preference), choices were presented in random order. Names for each of the favorability, job approval, and name recognition series were presented in random order. The survey has an overall margin of sampling error of +/- 3.0% with a confidence interval of 95%; the margins of sampling error for questions specific to congressional districts or primary candidates are indicated in the marginal tables. The data are weighted for age, gender, geography, and education based on a voter demographic model derived from historical voting patterns, but are not weighted by party registration or party identification.

The Survey Center continually studies the components that construct a poll, such as interview techniques, voter modeling, and collection methods, in order to refine its methodology and adjust to changes in voter and respondent behavior. This poll departs from the Center's standard use of live telephone interviews and implements an online collection methodology that has been under ongoing study and refinement. Comparison with previous Center polling, as this presentation explicitly does in its review of public figure favorability, should be evaluated in this context.

OVERVIEW:

New Hampshire Institute of Politics Executive Director Neil Levesque summarized the results, saying, “The political environment has remained remarkably stable through this summer, with the popularity and job approval of New Hampshire’s elected officials remaining steady and the primary elections to determine challengers beginning to come into focus. Joe Biden’s popularity (49% favorable/50% unfavorable) is inching up close to even, while President Donald Trump (41% favorable/58% unfavorable) remains steadily unpopular. The selection of Kamala Harris was greeted favorably by Biden voters, with 76% reporting more confidence in his election chances with her on the ticket, while 70% of Trump voters believe Harris weakens Biden’s chances. The net result is a small bump for Biden in voter preference, which he now leads 51%-43%, up from 49%-42% in June. Despite Biden’s lead, a slight plurality of voters (44.4%-43.6%) believe that Trump will prevail in November.

“Interest in the fall elections remains very high, with 88% of all voters “extremely interested”, including 95% of Democrat voters and 85% of Republican voters. This may presage a turnout advantage for Democrats, and is a possible indication that the highly polarized environment may be damaging Trump’s re-election chances.

“Governor Chris Sununu remains very popular (67% favorable/31% unfavorable) and continues to earn high job approval through the COVID-19 crisis (73% approve/26% disapprove). Voters approve of the job Senators Jeanne Shaheen (53% approve/38% disapprove) and Maggie Hassan (50% approve/39% disapprove) are doing, while both Congressman Chris Pappas (43%-33%) and Congresswoman Annie Kuster (47%-38%) are under 50% approval.

“With the primary election just over two weeks away, challengers for the general election are likely to be determined by how familiar they are to voters. In this regard, only previous nominee Steve Negrón (44% favorable/5% unfavorable) has a clear name recognition advantage over his opponent, translating into a 37%-15% voter preference lead over Lynne Blankenkemper in the 2nd CD Republican Congressional primary. First-time candidate Matt Mowers (29% favorable/7% unfavorable) is building recognition, and currently enjoys a 23%-12% lead over Matt Mayberry in the 1st CD Republican Congressional primary. Both the Democratic Gubernatorial primary and the Republican Senate primary are currently close contests that will come down to who can connect with voters in these final days.”

“New Hampshire voters traditionally start focusing on the general election soon after Labor Day,” concluded Levesque. “Although there is a high degree of voter interest already, the races will come into sharper focus once the parties have chosen their nominees in a couple weeks. As stable as the political environment has been for incumbents so far, the races have yet to begin in earnest.”
