**A SURVEY OF NEW HAMPSHIRE
VOTER ATTITUDES
JUNE 2020**

Neil Levesque
Executive Director, New Hampshire Institute of Politics

Faculty Advisor:
Tauna Sisco, PhD
Chair, Department of Sociology

SURVEY NOTES:

These results are from the Saint Anselm College Survey Center poll based on online surveys of 1072 New Hampshire registered voters expressing an interest in this fall's elections for President, Governor, and Congress. Surveys were collected between June 13 and 16, 2020, from cell phone users randomly drawn from a sample of registered voters reflecting the demographic and partisan characteristics of the voting population. For questions in which respondents were asked to select from a list of options (e.g. presidential preference), choices were presented in random order. Names for each of the favorability, job approval, and name recognition series were presented in random order. The survey has an overall margin of sampling error of +/- 3.0% with a confidence interval of 95%; the margins of sampling error for questions specific to congressional districts or primary candidates are indicated in the marginal tables. The data are weighted for age, gender, geography, and education based on a voter demographic model derived from historical voting patterns, but are not weighted by party registration or party identification.

The Survey Center continually studies the components that construct a poll, such as interview techniques, voter modeling, and collection methods, in order to refine its methodology and adjust to changes in voter and respondent behavior. This poll departs from the Center's standard use of live telephone interviews and implements an online collection methodology that has been under ongoing study and refinement. Comparison with previous Center polling, as this presentation explicitly does in its review of public figure favorability and job approval, should be evaluated in this context.

OVERVIEW:

New Hampshire Institute of Politics Executive Director Neil Levesque summarized the results, saying, "The big winner in this poll is 'Wrong Track', as an astonishing 72% of respondents now say that they believe our country is headed in the wrong direction. This is a perspective that cuts across party lines and demographics, with only very conservative voters holding a majority optimistic view. Beyond this pessimism, voters find little to agree on except for the performance of Governor Chris Sununu, whose handling of the COVID-19 crisis has earned him a 77% job approval. Only the very liberal, at 47%-50%, disapprove of Sununu's performance.

"Another point that voters agree on is the professionalism of local police, with 85% rating their own department as very or somewhat professional. There is, however, disagreement on the significance of systemic police racism around the country, with 73% of registered Democrats saying it is a major issue with only 13% of Republicans agreeing. Similarly, while 86% of Democrats believe that racial and ethnic discrimination is a major issue in our country, 57% of Republicans believe it is a minor or no issue. 94% of Democrats believe that race relations have gotten worse since the election of President Trump; only 13% of Republicans agree. Only 28% of very conservative voters believe the anger of those protesting the death of George Floyd is justified; on the other hand, 57% of very liberal voters believe that rioting is justified, and 30% of respondents with graduate or professional degrees agree.

"These partisan and ideological fissures apply to COVID-19 as well, as 51% of Democrats and 63% of the very liberal fear that restrictions to curtail spread of the virus are being lifted prematurely; 45% of Republicans and 53% of the very conservative believe the restrictions have been left in place too long. 45% of Republicans expect to return to their normal everyday routines quickly; only 5% of Democrats agree, and 34% expect never to return their previous routines. There is broad agreement that peaceful protests and religious activities

should not be exempt from social distancing rules. However, 54% of very conservative voters believe that religious activities should be exempt.

“Unsurprisingly, this polarization and pessimism is impacting incumbent officeholders as primary races get underway. All members of the Congressional delegation have seen their job approval steadily erode since the beginning of 2019, leaving Senator Shaheen at 52% approval, Senator Hassan at 49%, Congressman Pappas at 47%, and Congresswoman Kuster at 45%. An environment in which 72% of one’s constituents believe the country is headed on the wrong track is not ideal for running for re-election; however, Democrats do have three structural advantages that will help counterbalance the poor environment: enthusiasm, as 92% of Democrats are extremely interested in the election to 86% of Republicans; a 46%-43% lead in the generic congressional ballot; and a putative nominee, Joe Biden, that leads Trump in the presidential ballot, 49%-42%. In addition, potential challengers to Shaheen, Pappas, and Kuster all have significant work to do over the summer to raise their profiles with primary voters.

“Like most of the country, New Hampshire is politically polarized and riven on the most talked-about issues of the moment. As the executive playing a highly-visible role in guiding our state through a major crisis, Governor Sununu has largely escaped the polarization; the rest of the races are likely to be highly contentious as we move past the conventions and the primaries into the general election season.”
